

Picking the math courses that fast-track you towards your goals?

It's as easy as 1-2-3.

If you're interested in a career or transfer program in **DENTAL or ALLIED HEALTH**, the *charts to the right* show you which classes to take to begin your path.

For a full list of math requirements for the program you are in, please make sure to reference the college catalog.

About Math 0095

All CCRI students are required to take the ACCUPLACER placement test before registering for classes. If the test shows that you need to strengthen your math skills, you'll need to enroll in MATH 0095, our **"Developmental Math Emporium."**

The **Math Emporium** at CCRI is a new and innovative classroom model where students can master developmental math topics needed for credit bearing courses. Using ALEKS, an artificially intelligent assessment and learning system, and individual, on demand, one-on-one instruction from faculty members, students will have the opportunity to complete all of their developmental course work in one semester.

Dental or Allied Health MATH PATHS

If your goal is to enter the Dental Assisting or Magnetic Resonance Imaging program, you'll want to complete the following courses within the Developmental Math Emporium:

MATH 0095
(MATH 0099 and 0100)
