

# Math 0200: Support Course for College Algebra

**Credit hours:** 2 remediation (in-house) credits with a Pass/Fail grade scheme

**Prerequisites:** Math 0100 with a grade of C or better and concurrent enrollment in the Math 1200 course with the same section number.

## Course Description

This course provides active support for students taking Math 1200 through the use of a just in time remediation approach. Students in this class will also be taking Math 1200 with the same instructor concurrently. The additional two hours per week allows for time to practice what has been learned in Math 1200 and it allows for more question and answer sessions. Instructors may use the class time for supplementary instruction, group work or one on one support.

## Course Objectives

1. Develop the critical thinking and study skills necessary for success in Math 1200
2. Make the transition from developmental mathematics to Math 1200
3. Reach a level of mathematical maturity necessary for success in Math 1200

## Learning Outcomes

The learning outcomes for this course are identical to those of Math 1200. The purpose of this class is to allow students who might otherwise not be eligible to take Math 1200 to complete the course with added support. Students in this class will take Math 1200 for four hours per week in addition to attending this class for two hours per week. Instructors will use the additional time to provide supplemental instruction, review difficult concepts, help students with homework and answer student questions.
