

COMMUNITY COLLEGE  
OF RHODE ISLAND

Dear Incoming Student,

The Community College of Rhode Island has provided you with a *Mandatory Immunization Requirements* Form that identifies Rhode Island Department of Health vaccination requirements for all incoming full time students (12 credits or more) as well as any student, full or part time, enrolled in any of the health related fields of study. We request that this Form be completed and submitted by the beginning of the academic year.

If you are finding it difficult to obtain missing vaccinations from your local provider, Health Services is pleased to offer assistance prior to the first week of classes in September. The Wellness Company, a local medical services provider, will conduct a clinic at the Warwick Campus on August 23<sup>rd</sup> from 3-7 pm. They are prepared to administer the following vaccinations.

- Td (tetanus and diphtheria)
- MMR (measles, mumps, and rubella)
- Varicella (chickenpox)
- Hepatitis B
- Meningitis

All vaccinations must be scheduled directly with the Wellness Company at least two weeks prior to the clinic date. You may contact them directly at (401) 461-0662 to make an appointment and arrange payment.

We look forward to your arrival on campus.

Wenda Ferraioli R.N.
